Experience

Qualified Person – Quality Manager

B.T.G. - SOL Group

July 2018 – Current

B.T.G., Lessines, BE

- As QP, I am responsible for the release of medicinal products destined for several countries within the EU and UK. As Quality manager, I am responsible for the Quality Management System of manufacturing and distribution activities for industrial, foodgrade, and medical gases.
- Key Achievements are: Getting the company out of GMP Compliance management status; Significant increase in efficiency of performing time-consuming activities such as data collection, redaction of registers and invoice checks by automating these processes; Vast reduction of the occurrence of issues throughout the product lifecycle by setting up a documented receptionning system of all incoming critical products.
- Activities include, but are not limited to: Ensuring GMP compliance; Applying Quality Risk Management principles; Training staff on GxP-related topics; Validation & qualification of manufacturing equipment and processes, lab equipment and software; Execution of audits; Providing support on complaint and deviation handling; Maintaining an up-to-date Site Master File; Redaction of Product Quality Reviews; Prompt Batch Release

QA associate

Conforma

May 2017 – July 2018

Conforma, Destelbergen, BE

- As QA associate, I was responsible for several aspects of the Quality Management System. Using my knowledge of pharmaceutical packaging and production activities I carried out extensive deviation handling. I was also responsible for the CAPA-system and I helped employees in keeping up high GMP-standards during production and packaging activities using face-to-face communication and group trainings. Furthermore I led the team that was responsible for the cleaning of production areas.
- I have set up systems to improve in process controls of packaging activities and perform process monitoring.

Project engineer – QP internship

Pfizer

Sept 2016 – March 2017

Pfizer CSP, Puurs, BE

- As PE in validation of secondary packaging lines, I was responsible for assessing the possible impact of every change made to the secondary packaging process.
- As system owner of Outsourced Activities I was a contact point for contractors concerning commitments made in quality agreements.

Research internship in Biotechnology

Ghent University

Sept 2015 – Jan 2016

Faculty of Pharmaceutical Science, Ghent, BE

- I learned to apply bio-informatical analysis on data gained from Next Generation Sequencing using self-written scripts in Python and RStudio.

About me

“ As a student I learned that persistence pays off. If I have my sights set on something, I will give my full dedication to achieve that goal. From my experience at Pfizer, Conforma and BTG, I have become familiar with different types of pharmaceutical environments. Throughout my career I learned to work in a team and advance with mutual consent towards positive outcomes.

I love challenging myself, learning new things and working with cutting-edge technology in this fast evolving world around us. I am adaptable, motivated and willing to travel for my job. “
